Do you know that you're infringing Facebook's 'Conditions Of Use' if you have a business profile on a personal page? Talk to us and we can fix it.

Microsite: A microsite offers you the full functionality of a website within your Facebook space. This offers limitless opportunity to develop you Facebook as an e-commerce solution. Microsites can have flash functionality which makes them visually stunning and feature rich including video and audio for the ultimate experience. If this is the only website you have then you are ready to roll.

Facebook Landing Page: A landing page is the ideal space to let your customers know that you mean business. There are many variations to consider and we highly recommend the stepping stone landing page. This page is designed to step your customer from your Facebook experience into your website.

Profile Pic Ads: The profile pic can be an elongated advert and is a competitive alternative to a full landing page.

Yes, we do have a telephone number but there's no point in crowing about Facebook and websites and not having you visit us there.
